

PARALLEL UNIVERSES

There are certain occasions in life when the establishment of a bond occurs in a natural way, a sudden organic connection is created, and all the instincts are liberated.

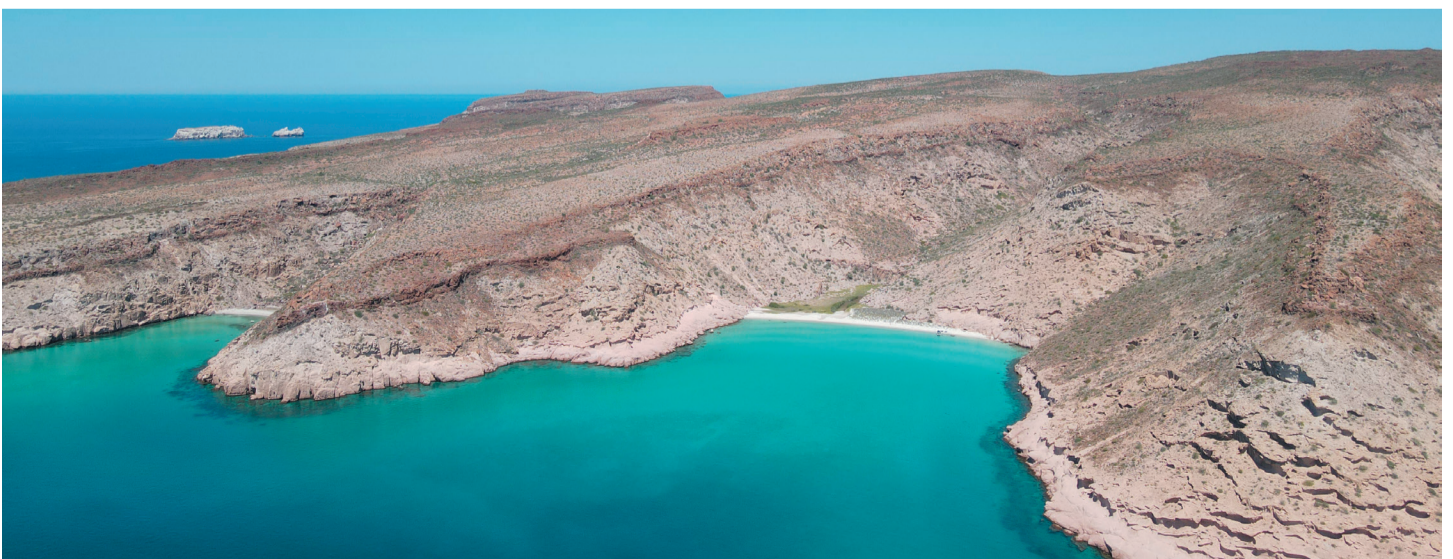

The aquatic venture exclusively curated for *The Enclaves, A Ritz-Carlton Reserve Residence*, provided by *InCabo Travel*, inspire to raise awareness for the ocean conservation while respectfully immerse in an underwater exploration within one of the protected areas of the Espiritu Santo Island, La Lobera, home, and nursery of one of the greatest colonies of California Sea Lions located in Baja Sur.

Plunging into the Sea of Cortez, also called "The Aquarium of the World" by Jacques Cousteau, provides a one-of-a-kind experience, the possibility of sharing privileged moments in time with those who truly belong here.

Espiritu Santo Island is a true testament of the majesty of Mother Earth. The exquisite place hosts year-round, permanent, and seasonal guests underwater, inland, and above the sky.

And in this petit world of exploration, observation and conservation, fear is left behind, and only the kindness of respect between the space and time of all the worlds present here, allows the creation of a deep connection and the momentarily coexistence.
